Cikarang Utara, Kabupaten Bekasi, Jawa Barat

A Final Year Informatics student at President University with a focus on Artificial Intelligence. Passionate about AI, data, and web development, with practical project experience. Strong communicator with excellent collaboration and organizational skills. Eager to apply knowledge to real-world challenges and continuously develop technical expertise.

EDUCATION

President University **Sept 2023 – Sept 2026**
Bachelor of Informatics – Expected Graduation : 2026

- GPA: 3.90/4.00
- Jababeka Scholarship (2nd Rank)
- Undergraduate Thesis: Developed an AI-powered financial auditing system using an Autoencoder to generate 8-dimensional latent representations and K-Means clustering to group financial records, enabling unsupervised anomaly detection and interpretable financial risk analysis. Evaluated cluster quality using the Silhouette Score.

INTERNSHIP EXPERIENCE

PT Alpabit Digital Inovasi (On-Site) **Sept 2025 – June 2026**
Backend Engineer Intern

- Developed a Flight Membership & Rewards System using Oracle OSB 11g/14c and Oracle BPM 12c/14c.
- Managed Oracle WebLogic environments, including domain health checks, application performance monitoring, and deployments.
- Integrated SOAP web services using XML/WSDL and maintained Oracle Database schemas, SQL queries, and stored procedures; implemented Oracle Coherence for distributed caching.
- Created technical documentation in English and Indonesian and delivered knowledge-sharing sessions and technical demonstrations to employees.

PT. Ngontenin Digital Indonesia (Remote) **August 2025 – Oct 2025**
Frontend Engineering Intern

- Developed and refined React frontend features while fixing bugs and improving website responsiveness.
- Collaborated with backend developers to improve UI functionality and resolve usability issues.
- Tested and debugged the application across browsers and devices to ensure consistent performance.

ORGANIZATION EXPERIENCE

President University Computer and Technology Enthusiast Club **Oct 2024 – August 2025**
Head of External Division

- Led external relations and coordinated partnerships for club events and workshops.
- Managed division members, delegated responsibilities, and coordinated program execution.
- Researched and prepared Instagram content to support club promotions and knowledge sharing.

PUMA Informatics **Nov 2023 – Sept 2024**
Vice Head, Student Development & Competition Division

- Coordinated division members and delegated responsibilities to ensure effective team execution.
- Organized IT workshops, competitions, and student development programs.
- Facilitated mentoring sessions for national tech competitions and collaborated with university departments on student development initiatives.

SKILLS & TOOLS

- **Web Development:** Laravel, React.js, Vite, Flask, HTML, CSS, Bootstrap, Tailwind, Flowbite.
- **Enterprise & Integration:** Oracle SOA Suite (OSB, BPM), Oracle Coherence, XML, WSDL.
- **Databases:** MongoDB, Firebase, Oracle DB, MySQL.
- **Programming Languages:** Python, JavaScript, Java, SQL, XQuery.
- **AI / ML:** TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers, Computer Vision (Object Detection & Image Classification), NLP, Large Language Models (LLMs), OCR.
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, DBeaver, Jira, Kaggle, Vercel, Microsoft 365, Google Workspace, Notion, Blender.

PROJECTS

- **Osky Project** — *Internship Project.*
  Developed an enterprise booking and membership system using Oracle OSB 14c, Oracle BPM 14c, WebLogic Server, Oracle Database, SOAP services (XML/WSDL), and Oracle Coherence.
- **Defect Detection and Root Cause Analysis System** — *Academic Project in Collaboration with PT Mattel Indonesia*.
  Developed a defect detection and root cause analysis system using Detectron2 (RCNN) to support manufacturing quality control through deep learning and a web interface.
- **COVID-19 Question Answering Chatbot** — *Academic Project*.
  Developed a COVID-19 question-answering chatbot using Python, Flask, BERT, and RoBERTa, with an interactive web interface and FAISS for efficient response retrieval.
- **Personal Portfolio** — *Personal Project.*
  Developed a responsive portfolio website using Vite, React.js, Tailwind CSS, Flowbite, and Lucide React, integrated with Gemini AI for interactive portfolio queries.
- **Training Yoga Image Classification** — *Academic Project.*
  Developed a yoga pose image classification system using ResNet, EfficientNet, VGG, and MobileNet, with automated class imbalance handling and performance evaluation.

- **Student Grading System** — *Academic Project.*
  Developed a web-based grading system using PHP, Laravel, and MySQL, enabling teachers to manage grades and students to view their academic results.

TRAINING

- Data Science, Machine Learning (Beginner), elevAIte, Produktif dengan AI — Dicoding
- Generative AI, Linear Models in Machine Learning — Digitalent
- Llama Devlab ID, Student development initiative (IBM) — Hacktiv8
- Data Series fair 14.0 — Dibimbing
- Young On Top Leadership Program — YOT
- Korean ASEAN Digital Academy — KADA

LANGUAGE

- English (Advanced) — Duolingo English Test (Scores: 120), TOEFL ITF (Scores: 540)
- Mandarin (Beginner)
