Cikarang Utara, Kabupaten Bekasi, Jawa Barat

Informatics student at President University with a focus on Artificial Intelligence. Passionate about AI, data, and web development, with practical project experience. Strong communicator with excellent collaboration and organizational skills. Eager to apply knowledge to real-world challenges and continuously develop technical expertise.

EDUCATION

President University — **Bekasi, Jawa Barat**
Sept 2023 – Present

- GPA: 3.90
- Jababeka Scholarship (2nd Rank)

EXPERIENCE

PT Alpabit Digital Inovasi (On-Site) — **Indonesia**
Backend Engineer Intern — **Sept 2025 – June 2026**

- Developed a Flight Membership & Rewards System using Oracle Service Bus (OSB) 14c and Oracle BPM 14c.
- Managed Oracle WebLogic Server environments, performed domain health checks, and monitored application performance and deployments.
- Designed and integrated SOAP web services using XML and WSDL within a Service-Oriented Architecture (SOA).
- Implemented Oracle Coherence to improve application performance through distributed caching.
- Developed and maintained Oracle Database schemas, SQL queries, and stored procedures to support secure and reliable data management.
- Delivered project knowledge-sharing sessions and technical demonstrations to PT Alpabit Digital Inovasi employees.

PT. Ngontenin Digital Indonesia (Remote) — **Indonesia**
Frontend Engineering Intern — **August 2025 – Oct 2025**

- Fixed bugs and improved the responsiveness of the main website to enhance user experience.
- Developed and refined frontend features and functionality for the main application using React.
- Collaborated with the backend team to implement UI improvements and resolve usability issues.
- Performed testing and debugging to ensure stable performance across different browsers and devices.

President University Computer and Technology Enthusiast Club **Indonesia**
Head of External Division **Oct 2024 – August 2025**

- Led external relations to support club activities
- Managed collaboration for events and workshops
- Managed division members and delegated responsibilities to ensure successful program execution
- Conducted research and content preparation for the club's Instagram to support promotions and knowledge sharing

PT Mattel Indonesia **Indonesia**
AI Developer (Project-Based, Academic Collaboration) **Apr 2025 – May 2025**

- Developed an AI-powered defect detection system using RCNN with Detectron2 to support quality control
- Developed an integrated root cause analysis module to identify potential causes of detected defects.
- Collected, preprocessed, and annotated datasets to improve model performance and reliability.
- Completed as an AI Concentration final project in collaboration with PT Mattel Indonesia.

PUMA Informatics **Indonesia**
Vice Head, Student Development & Competition Division **Nov 2023 – Sept 2024**

- Coordinated division members and delegated responsibilities to ensure effective team execution
- Led the organization of IT workshops, competitions, and student development programs
- Facilitated mentoring sessions to prepare students for national tech competitions
- Collaborated with university departments to deliver student development initiatives

SKILLS & TOOLS

- **Technologies:** Laravel, React.js, Vite, Flask, HTML, CSS, Bootstrap, Tailwind, Flowbite.
- **Enterprise & Integration:** Oracle SOA Suite (OSB, BPM), Oracle Coherence, XML, WSDL.
- **Databases:** SQL, MongoDB, Firebase, Oracle DB.
- **Programming Languages:** Python, JavaScript, Java.
- **Artificial Intelligence:**
  - **Machine Learning:** Supervised, Unsupervised, Reinforcement Learning.
  - **Deep Learning:** Model training, fine-tuning, and deployment.
  - **Computer Vision:** Object detection, classification, image processing.
  - **Natural Language Processing (NLP):** Text classification, generation, summarization, sentiment analysis, speech processing, transformers, large language models (LLMs).
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Vercel, Kaggle, Google Colab, Notion, VS Code, Firebase Console, Google Workspace, Microsoft 365, Blender, Moodle, Postman, DBeaver, Jira.

PROJECTS

- **COVID-19 Question Answering Chatbot –** *Academic Project*. Developed a COVID-19 question-answering chatbot using Python, Flask, BERT, and RoBERTa, with an interactive web interface and FAISS for efficient response retrieval.
- **Defect Detection and Root Cause Analysis System –** *Academic Project*. Developed a defect detection and root cause analysis system using Detectron2 (RCNN) to support manufacturing quality control through deep learning and a web interface.
- **Personal Portfolio –** *Personal Project.* Developed a responsive portfolio website using Vite, React.js, Tailwind CSS, Flowbite, and Lucide React, integrated with Gemini AI for interactive portfolio queries.
- **Training Yoga Image Classification** – *Academic Project.* Developed a yoga pose image classification system using ResNet, EfficientNet, VGG, and MobileNet, with automated class imbalance handling and performance evaluation.
- **Game News & Shop** – *Academic Project***.** Developed a game news and shop website using HTML5 and CSS3, featuring game information, recommendations, a mock shop interface, and user authentication.
- **Student Scores Prediction –** *Academic Project.* Built and deployed a linear regression model on Google Cloud to predict student scores based on study hours, including data preprocessing, visualization, and model evaluation.
- **Student Grading System** – *Academic Project***.** Developed a web-based grading system using PHP, Laravel, and MySQL, enabling teachers to manage grades and students to view their academic results.
- **Simple Photo Editor** – *Academic Project*. Developed a photo editor using Python, Tkinter, OpenCV, and Pillow, supporting image filtering, color adjustment, transformations, and segmentation.
- **Plane Ticket Booking & Membership System** – *Internship Project.* Developed an enterprise booking and membership system using Oracle OSB 14c, Oracle BPM 14c, WebLogic Server, Oracle Database, SOAP services (XML/WSDL), and Oracle Coherence.
- **ACCEL – AI-Integrated Financial Auditor Dashboard** – *Capstone Project.* Developed the K-Means clustering and risk classification pipeline, and prepared financial datasets for AI-powered anomaly detection.

OTHERS

Language: Indonesian Language (Native), English (Advanced), Mandarin (Beginner)
Certificates:

- Duolingo English Test (Scores: 120), TOEFL ITF (Scores: 540)
- Data Science, Machine Learning (Beginner), elevAIte, Produktif dengan AI – Dicoding
- Generative AI, Linear Models in Machine Learning – Digitalent
- Llama Devlab ID, Student development initiative (IBM) – Hacktiv8
- Data Series fair 14.0 – Dibimbing
- Young On Top Leadership Program – YOT
- Korean ASEAN Digital Academy – KADA
